

On the day of Sunday, February 24th, 2019, I was blocking Wayne ave at the corner of Wayne ave and Marietta St. The wind was blowing pretty hard. From where I was, at the south west corner looking north, I could see Mr. Hogan's car and the sign. I could see the sign on the pole rocking back and forth in the wind. I could tell that it was being held on by one screw. I was looking at traffic when I heard a loud noise that sounded like, and ended up being, a big sheet of metal being flopped around. I looked over and saw the sign fly off of the post and smack Rick's car. It then flew over his car and landed in the yard. It looked like the corner of the sign hit his A pillar and it looked like it hit it pretty hard. This happened right around 1:00 pm.
