TOYS

WOOD

BATTERIES

The City of Zanesville Sanitation and Recycling Divisions provides convenient recycling services to our City customers. Please take a minute to learn our easy recycling program and what we can accept.

The biggest issue with curbside recycling for all recycling haulers is the large amount of contaminants received from within the recycling carts. Items such as trash bags, food residue, Styrofoam, batteries, electronics, etc. are among the top contaminants and are not accepted at the recycling center.

If your item is not on the approved list, please place it directly into the trash. All items should be cleaned and dried before being placed into the cart - unbagged. Together, we can help protect the environment and build a more sustainable future.
